

Dear Everyone!

Many of you have probably noticed that only the officially released versions of Speakerguyz's track "**Galaxy**" are available on various social media platforms. The reason for this is that I have a **zero-tolerance** policy towards pirate versions, as they cause serious financial damage to the author – in this case, me. There was a remix contest for the track back in the summer of 2013. I received many demos, but ultimately, only one, the **Hard Revolution remix**, met the quality requirements, while the others did not. Therefore, only this remix was officially released. However, many other unofficial versions that remixers uploaded to various social media sites without my consent! While these are unique creations, they forget that the vocals, melody, and all other elements found in the unofficial remix are protected under the original song's copyright. Therefore, when these versions are uploaded to various social media sites without my permission, copyright infringement occurs! Every such infringement has consequences. The publisher's claims management team regularly checks illegal versions and orders their immediate removal.

Please, if you have received a warning on your channel, do not send me an email regarding this issue, as I cannot withdraw the claim!

This is not a personal decision, but rather one based on financial interests. I assume you wouldn't want something you've invested time, energy, and money into – with hopes of some return – to be thwarted. Pirate versions take money out of my pocket. However, if you share the original versions of the song on your social media platforms, **I will NEVER** file a claim. In fact, I appreciate you promoting the original version on your platforms. By clicking the following link, you can find the officially released maxis of "Galaxy":

Albums

Galaxy - EP
